عناوين مشاريع التخرج لطلبة

المرحلة الرابعة

قسم هندسة الاتصالات

كلية العراق الجامعة

2023-2024

عــنوان المشـــروع	عدد المشاريع	أســـــم المشـــرف	ت
1- Design an education platform for traditional GSM Architecture			1
2- The learning environment for 3G modeling of historic buildings			2
3- Modeling 4G Architecture Learning Environment Design	7	م.د. محمود الشريدة	3
4- Environments for Learning Based on Classical 5G Architecture			4
5- Design education platform for traditional 6G Architecture			5
6- Mutual Authentication based on ECC using Raspberry Pi			6
7- Bilinear-pair-based mutual authentication using a Raspberry Pi			7
Raspberry Pi face recognition			8
Wireless Sensor Networks Simulation by Matlab			9
Design Noise Cancellation System by Using Raspberry Pi	6	م.م. علاء ابراهيم	10
IoT based web controlled home automation using raspberry Pi			11
Real-time traffic sign detection and recognition using raspberry			12
Arduino gesture control robot			13
1. Smart port management system.	2	م.م. محمد جمال شاكر	14
2. Efficiency and automation in ports: developing a prototype stacking crane for loading and unloading using Arduino.			15
1- Advanced aquatic life and environment monitoring system: an IoT-powered solution for enhanced fish farming sustainability and management			16
2- Enhancing factory efficiency: IoT -powered conveyor system for color sorting and quantitative analysis	4	م.م. حمزه هادي قاسم	17
			18
3- Intelligent vertical transportation: a cutting-edge IoT -enabled elevator monitoring system			19
4- Driving sustainable fueling innovation: an IoT centric exploration of smart e-fuel stations with raspberry Pi 3			20
1- Model design for transporting water containers using plc	2	م.م. ضحى كريم	21
2-Design of a solar panel cleaning robot			22
